EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The first paragraph, line 2, has been amended by inserting -- now U.S. Patent No. 6,787,123, -- after "April 26, 2002,"

EXAMINER'S REASON FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

As to claims 1-3, and 12-14, the prior art fails to disclose or suggest a rare earth zeolite Y having the recited unit cell after size aging under the recited steam conditions. The basis for the prior art rejection in the previous action was that the unit cell after aging would be inherent to a zeolite if the composition and crystal structure were the same. However, inherency must be established by showing that the prior art must flow from the disclosure of the prior art. See MPEP 2112. The fact that a characteristic may be present is not sufficient. Id. The catalyst designated DB-3 in Table 1 shows that a catalyst may have a composition and crystal structure identical to the presently claimed structure and composition, but does not possess the recited unit cell size after aging. Thus, the examiner has no basis for the assertion of inherency.

As to claims 4-11, the prior art fails to disclose or suggest treating a rare earth exchanged zeolite Y with gaseous silicon tetrachloride.
